

Clinical Neuroscience and Developmental Dyslexia

Fri, March 26, 2021
19:00-21:00, GMT+9

Fee: Free of charge

Venue: Online via Zoom

Language: English

Registration : <https://zoom.us/meeting/register/tjMude-vqD0pH9JCuvKI PRh5x8mrEaY6N3X8>

In this webinar, an expert from Harvard Medical School will share his knowledge on the neurological underpinnings of language and language-based learning disabilities and ways by which neuroscience can be useful in the clinical practice of developmental disorders. Also, scholars from Tohoku University, both speakers and participants, will join in the discussion after Dr. Galaburda's lecture. There will be slides in Japanese translation. Let's have a good time together.

Guest Speaker:

Albert M. Galaburda, MD

Emily Fisher Landau Professor of Neurology and Neuroscience, Harvard Medical School
Co-director, Mind Brain Behavior Interfaculty Initiative, Harvard University
Senior Neurologist, Department of Neurology

Speaker, Commentator:

Yutaka Matsuzaki, PhD

Assistant Professor of Institute of Development, Aging and Cancer, TOHOKU UNIVERSITY.
Division of Developmental Cognitive Neuroscience

MC, Organizer:

Kazuhito Noguchi, PhD

Professor of Graduate School of Education / Faculty of Education, TOHOKU UNIVERSITY

Assistant

commentator:

Fumie Shibuya, PhD

Fellowships from Japan Society for Promotion of Science, Graduate school of education, TOHOKU UNIVERSITY

Co-Organizer:

Akihiro Kawasaki, PhD.

Associate professor of Graduate School of Education / Faculty of Education, TOHOKU UNIVERSITY
